A Message From the MTA/NJ President

Dear Members, Friends and Fellow Boaters,

As I write this message, the 2014 boating season is well underway. I am pleased to report that after a number of challenging years, we finally have a sense of good health on the horizon for the marine industry in NJ. Since the collapse of the economy and Hurricane Sandy, the boating industry has been hit very hard with losses that will take years to recover from. However, recently the industry has seen modest growth in new and used boat sales as well as brokerage boats. Fuel companies are reporting an increase in sales as well and there are more boaters out on the water enjoying our waterways and having fun. We can certainly thank Mother Nature for the beautiful weather we have been having which has greatly helped everyone this year. The industry's growth is due to the hard work and perseverance of our marine professionals and the recreational boaters who choose to spend their money and recreate with us. Be sure to visit our new website GoBoatingNJ.org for all of your boating resources.

As for our much appreciated members, we will be holding our biennial conference in March 2015. This is an educational event that provides our marine businesses with a wealth of knowledge and information. It is always a huge success thanks to our conference presenters, sponsors and exhibitors and there are plenty of opportunities to participate. More details will be available soon and we hope to see everyone there in 2015.

We will once again be hosting two boat shows that you will not want to miss: The Jersey Shore Boat Sale and Expo at First Energy Park in Lakewood NJ "Home of the Blue Claws" September 19th -21st 2014. NJ Boat Sale and Expo at the NJ Convention and Expo Center in Edison NJ February 19th -22nd 2015. Last year's NJ Boat Sale and Expo was in great demand and sold out. So if you are interested in exhibiting, don't delay; reserve your space now. If you want to attend or need more information on either of these shows, visit JerseyBoatExpo.com

Since becoming President of the Association, I have had the pleasure of working with many of our members, board members and state agencies along with a dedicated staff working behind the scenes to insure the organization and industry's success. The Association is extremely fortunate to have Melissa Danko, Chelsea Simkins and Alissa Malkemes and we appreciate their expertise and dedication to the association.

In closing, I would like to thank the consumers who patronize our members businesses listed in this handy directory and all of the members for their continuous support.

Sincerely,

Fred Brueggemann
MTA/NJ President

About The Marine Trades Association of New Jersey

Established in 1972, the Marine Trades Association of New Jersey (MTA/NJ) is a non-profit trade organization dedicated to advancing, promoting and protecting the recreational marine industry and waterways in New Jersey. The MTA/NJ is dedicated to promoting the interests of the industry as a whole for the benefit of its individual members and the consumers whom they serve.

The MTA/NJ maintains a year round fully staffed office representing the interests of the industry and providing assistance and information to members, marine businesses and the boating public. The MTA/NJ staff is available to assist marine businesses and boaters with questions and to provide guidance in solving boating and marine-related problems.

The MTA/NJ has an aggressive approach to legislative issues, lobbying and governmental relations through its lobbyist from State House Strategies in Trenton. The MTA/NJ is very active in the movement, opposition and/or consideration of many pieces of legislation involving the recreational boating industry. The MTA/NJ meets frequently with legislators from all districts to raise awareness and support of the recreational boating industry and fight for the rights of its members and recreational marine businesses helping them to grow and prosper in the State of NJ.

The MTA/NJ spends a significant amount of time and resources promoting the boating industry and member businesses to ensure that boating continues to grow. This is done through strategic advertising, marketing, promotions, special events and annual campaigns designed to get more people out on the water and into boating. The MTA/NJ also launched a new campaign, Go Boating NJ, to provide boaters with accurate, current information on the condition of New Jersey's waterways post Hurricane Sandy online at GoBoatingNJ.org. This new website is continually being updated and provides boaters with a wealth of boating resources, links, news, photos, videos and more. The MTA/NJ also works hard to communicate the economic importance of the boating industry. Recreational boating in New Jersey has a \$2 billion annual economic impact and provides close to 18,000 jobs.

The MTA/NJ owns and produces two boat shows, the Jersey Shore Boat Sale & Expo held at FirstEnergy Park in Lakewood in September and the New Jersey Boat Sale & Expo held at the New Jersey Convention & Exposition Center in Edison in February. The MTA/NJ is committed to making sure that there are affordable and successful local boat shows to support New Jersey's boat dealer members as well as all those that provide related goods and services. These shows are the result of that commitment and will not only help dealers and members sell their products and services but will help to strengthen the Association and the entire industry. More information about these events can be found at JerseyBoatExpo.com. The MTA/NJ also proudly endorses the Progressive Insurance Atlantic City Boat Show held in February.

The MTA/NJ offers a variety of educational seminars and workshops designed to help marine business owners meet the challenges and opportunities facing their business and the industry. Additional membership benefits include discount exhibit space on area boat shows, office supplies, shipping, and car rentals. Membership also includes advertising opportunities in Association publications, networking opportunities, internet links and referrals from other MTA/NJ members.

The MTA/NJ is a strong advocate for clean boating practices, providing education and outreach on the importance of protecting our natural resources, and is a lead partner in the successful New Jersey Clean Marina Program and a partner in the New Jersey Clean Vessel Act Program.

For more information about the many other things the MTA/NJ does, visit us on the web at mtanj.org or follow the Association on Facebook at facebook.com/njmarinetrades.

ASSOCIATION OF NEW JERSEY

"New Jersey's Voice On The Water"

**See All of New Jersey's Top Dealers,
along with our Boater's Marketplace & Kids Cove!**

Partners in Protection - Clean Marinas and You!

Certified Clean Marinas voluntarily take steps to protect our waterways and living resources.
Here's what you can do!

RECYCLE YOUR SHRINK WRAP - For recycling options in your area, visit njmsc.org/MIE/Resources.html.

CLEAN GREEN - Use phosphate-free, biodegradable and non-toxic cleansers.

DON'T TOP OFF YOUR TANK - Fill to only 90% of the tank's capacity.

TAKE CARE WITH SPRING COMMISSIONING - Place oil absorbent pads under exhausts and in bilge to prevent oily waste discharge.

CLEAN UP AT THE END OF THE DAY - Stash your trash and recycle used oil, antifreeze and batteries.

Patronize New Jersey's Clean Marinas!
For a list of Clean Marinas, visit NJCleanMarina.org

Clean Ocean Action's 10 Tips For Boaters

1. **Stash the trash!** Before you leave the dock, remove excess packaging, keep trash secure, and dispose of all trash and recyclables properly.
2. **Use environmentally-safe, anti-fouling strategies.** Use a less toxic or non-toxic hull paint. Clean hull often to limit growth.
3. **Recycle old fishing line.** Monofilament fishing line takes up to 600 years to break down in the marine environment and can entangle and kill wildlife. Look for recycling facilities at your marina. If none, start one; contact BoatUS.com/foundation/monofilament.
4. **Spills matter.** Fuel tank with care and attend nozzle at all times. A single gallon of fuel can contaminate over a million gallons of water; every drop pollutes. To be safe from spills, Fill tank to 90% capacity to reduce chance of spills.
5. **Don't throw butts overboard.** Cigarette filters don't break down in the environment and can be lethal when eaten by birds and fish that mistake them for food. Visit COA's website, for the "No Butts About It" 10 tip card for smokers.
6. **Keep it clean.** Never discharge sewage waste into the water even if allowed by law. Use the nearest pump-out facility. If you have a portable toilet, empty it at home or at a designated dump station. Use microbial cleaners instead of harmful disinfectants for toilets.
7. **Use a non-phosphate, biodegradable soap** when cleaning your boat. Ask your marina to stock these items.
8. **Avoid using disposable plastic boat covers or shrink-wrap.** Reusable polyester and polyethylene covers last a few seasons and canvas covers last even longer. If you must use shrink wrap recycle after use (www.state.nj.us/transportation/airwater/maritime/pdf/boatersshrinkwrap.pdf).
9. **Keep engines leak-free and well tuned** to minimize the discharge of gas and oil in the water. Do not drain engine fluids into the water. To dramatically reduce emissions, replace your two-stroke engine with a four-stroke engine.
10. **Place a bilge "pillow" or pad in your bilge** to absorb oil from your bilge water. Dispose used bilge pads properly. Be sure to check bilge frequently.

~Waves of Thanks to Marine Trades Association of New Jersey~

We salute all clean mariners! *For more ways to keep the ocean clean visit:*

Keep New Jersey's Waters Clean Use Pumpouts!

Pumping out your boat's holding tank at a certified facility or into a pumpout boat will help keep New Jersey's water clean, and aid in the protection of our fish, shellfish, and wildlife populations. It will also help protect the health of everyone who enjoys New Jersey's coastal and freshwater resources. Please refer to the listing of available pump outs on the following pages.

For additional information about the New Jersey Clean Vessel Act (CVA) program, please contact the New Jersey Division of Fish & Wildlife at 856-785-2711 or write: New Jersey Clean Vessel Act, Nacote Creek Research Station, P.O. Box 418, Port Republic, NJ 08241.

Visit CVA on the Internet at: *NJBoating.org*

This information was produced by the New Jersey Department of Environmental Protection's Division of Fish and Wildlife on behalf of the New Jersey Clean Vessel Act program, a partnership with the U.S. Fish and Wildlife Service.

To report a pump out station that is not working or if you experience a problem with a pump out facility, please contact the Marine Trades Association of NJ at 732-292-1051 or send an email to info@mtanj.org.

NOTICE: Due to Superstorm Sandy, boaters should contact marinas in advance of their first visit to confirm the pumpout facility is operational for the season.

**KEEP OUR
WATER CLEAN—
USE PUMPOUTS**

*Your purchase of fishing equipment and motor boat
fuels supports Sport Fish Restoration.*

New Jersey's Pumpout Locations

Note: Not all marina's are required to follow the guidelines of the Clean Vessel Act. Please call marina's to verify cost, location and hours.

No Discharge

The following waterways have been declared no discharge areas by the US EPA:

The Shark River
The Manasquan River
The Navesink River
The Shrewsbury River
Barnegat Bay
Hudson River

It is illegal to discharge waste treated or untreated in No Discharge Areas.

Boating Safety Education & Minimum Mandatory Requirements

For Those Under 16

1. There are **NO EXEMPTIONS** to New Jersey age requirements.
2. Out-of-state residents in New Jersey for less than 90 days with a certificate issued by their state or country; OR written proof of completion of a substantially similar course to the NJ-approved course will satisfy the education requirements.

Boating Safety Course information may be located at
cgaux.org usps.org boat.us.com/courseline

Non-Tidal Boat License

Are you going to boat on non-tidal water (Water where the tide does not change)?

Yes →

Does one of the below listed exemptions apply?

No ↘

No Non-Tidal Boat License required.

No ↘

Non-tidal boat license required.

EXEMPTIONS

1. Vessel powered by a motor less than 1 HP or 12-volt electric motor.
2. Vessel 12 feet long or longer with less than 10 HP.
3. While competing in an authorized race pursuant to a permit issued by the Division of State Police in the Department of Law & Public Safety.
4. If the person is an out-of-state resident who has written proof of successful completion of a course substantially similar to a NJ approved Boating Safety Course. A Boat License is separate from the boating safety certificate and is issued by the Motor Vehicle Commission (MVC).

For more information on New Jersey's boating laws and to obtain a copy of the State's Boating Safety Handbook,

contact the nearest NJ State Police unit or call 609-882-2000, ext. 6173 or download a copy of the manual online at njsp.org/maritime. Be informed. Take a boating safety course and be safe on the water. Consider wearing a PFD at all times. The new inflatable models make this an easy and comfortable choice – for life. For information on dates and locations of boating safety classes near you, call 800-336-BOAT.

Registering Your Boat: You must register your boat in New Jersey if you operate 180 days or more in the State – or if you rent, lease or maintain property for the storage of your vessel. Registration is conducted through the NJ Motor Vehicle Commission at any of their office locations. Bring your title and prior registration with you. If you have a personal watercraft (PWC), have a bill of sale from the previous owner, properly signed and notarized. The registration card must be carried in the boat or PWC at all times when in use. An insurance policy on your boat is not required by law – but is always a good idea.

Proper Display of Letters and Numbers: Your letters and numbers must be block form (scripted lettering is not acceptable), a contrasting color, three inches high and mounted on the forward half of the bow (or vertical structure above the hull). They must read from left to right. Be sure to leave a space between the NJ prefix, the four numbers and the two-letter suffix. The registration decal, showing the expiration date of your registration, always goes aft (behind the letters and numbers) on each side of the boat, as follows: NJ 1234 AB (port side) - and - NJ 1234 AB (starboard side).

BOATING KNOTS

Knowing how to tie a few basic knots is essential to a boater's security. The art of knot tying is known as "Marlinespike." Good sailors take pride in their ability to chose and tie knots. Below are 7 Basic Knots you should know....If you master these knots, you'll be way ahead of most recreational boaters in your knowledge of marlinespike. For practice, a section of rope six feet long with a diameter of 3/8" is a good size. Tie each knot several times to make a mental picture of the sequence. With practice you'll be able to tie each knot without thinking about it.

NOTE: The end of the line that you work with in tying knots is called the "Bitter End." The main length of line is the "Standing Part."

Two Half Hitches

This reliable knot is quickly tied and is the hitch most often used in mooring. To tie:

1. Pass end of rope around post or other object.
2. Wrap short end of rope under and over long part of rope, pushing the end down through the loop. This is a half hitch.
3. Repeat on long rope below first half hitch and draw up tight.

Bowline

This knot doesn't jam or slip when tied properly. To tie:

1. Make the overhand loop with the end held toward you, then pass end through loop.
2. Now pass end up behind the standing part, then down through the loop again.
3. Draw up tight.

Figure Eight

This knot is ideal for keeping the end of a rope from running out of tackle or pulley. To tie:

1. Make underhand loop, bringing end around and over the standing part.
2. Pass end under, then up through the loop.
3. Draw up tight.

Square Knot

This knot is used at sea in reefing and furling sails.

To tie:

1. Pass left end over and under right end. Curve what is now the left end toward the right and cross what is now the right end over and under the left.
2. Draw up tight.
